INTERIOR VINYL FLOORING

INTERIOR VINYL FLOORING

In our offer you will find different types of vinyl floors that will perfectly underline any interior. Vinyl floors are becoming more and more popular, mainly due to their indisputable advantages. Thanks to its better construction, it can withstand even greater loads and, compared to a classic laminate floor, looks more natural in the interior. It also copes well with noise, both from you towards the neighbor and vice versa. Even underfloor heating will not harm vinyl, but the temperature must not exceed 28°C, otherwise the floor could be damaged. It can handle daily mopping without lifting or swelling at the joints, as can be seen with cheaper laminates. That is why vinyl floors are a clear choice in new and modern interiors.

Does not absorb water
